

# Jeein Kim

Ph.D. Candidate, Department of Astronomy, Yonsei University

[jikim.astro@gmail.com](mailto:jikim.astro@gmail.com) • +82-(0)2-2123-8513 • [ORCID 0000-0002-3170-7434](https://orcid.org/0000-0002-3170-7434) • [ADS library](#)  
[jeein-kim.github.io](https://jeein-kim.github.io)

## Research Interests

Resolved neutral hydrogen (HI) properties of local hard X-ray selected AGN host galaxies; the effect of nuclear activity on the surrounding cool gas reservoir and macro-scale (kpc–Mpc) gas feeding of Seyfert galaxies; HI-bearing, low surface brightness dwarf galaxies. Primary tools are radio interferometric HI line and continuum observations (VLA, ATCA, WSRT), complemented by optical spectroscopy (Gemini/GMOS).

## Education

|                |                                                                                                                                                                                                                                       |
